

PAN AFRICAN UNIVERSITY
Life and Earth Sciences Institute
(Including Health and Agriculture)

PAULESI GRADUATE CLASS 2021

UNIVERSITY OF IBADAN
Ibadan, Oyo State

PAN AFRICAN UNIVERSITY

VISION

The aim of Pan African University is to develop institutions of excellence in science, technology, innovation, social sciences and governance, which would constitute the bedrock for an Africa pool of higher education and research.

MISSION AND SCOPE OF PAU

To realize the strategic vision, six missions have been assigned to the PAU: Develop continental-wide and world-class graduate and post-graduate programmes in science, technology, innovation, human and social sciences

- Stimulate collaboration, internationally competitive, cutting-edge fundamental and development oriented research, in areas having a direct bearing on the technical, economic and social development of Africa
- Enhance the mobility of students, lecturers, researchers and administrative staff between African universities to improve on teaching, leadership, and collaborative research
- Contribute to the capacity building of present and future Africa Union stakeholders
- Enhance the attractiveness of African higher education and research institutions for effective development and retention of young African talent, while attracting the best intellectual capital from across the globe, including the African diaspora
- Invigorate dynamic and productive partnership with public and private sectors

Pan African University Pan Africaine

The advent of the African Union in 2000 as by product of the defunct Organization of African Unity witnessed a rethinking of Africa's development agenda and strategy, focusing more on the acceleration of the continent's political and economic integration. At the center of new continental priorities is the promotion of research in all fields, in particular science and technology. The Assembly of Heads of State and Government of the African Union therefore made a decision to establish the Pan African University (PAU) in 2010, and on 14 December 2011, the AUC launched PAU as a flagship continental initiative. The University's Statute was adopted by the Assembly in January 2013.

The PAU was inspired and driven by major policy frameworks of the AUC, including the vision of the African Union, the Second Decade of Education, and the Consolidated Plan of Action for Science and Technology. Within the same policy frameworks, PAU is embedded as a major instrument of the implementation of Agenda 2063, the Science, Technology innovation Strategy for Africa (STISA 2024), the Plan of Action for the Second Decade of Education for Africa which will give way to the African Continental Education Strategy; as well as the African Common Position on post 2015 Sustainable Development Goals.

Mission of the PAU

PAU has the mission to strengthen African Higher education and research, address quality, intra-African collaboration, innovation and links with industry and social sector. PAU is also a response to the quest to produce a critical mass of high quality intellectual capital for Africa, and make African higher education and research attractive, globally competitive, and locally relevant, as well as serve as a model for quality education. PAU is a new generation university constituted from educational and research structures already in operation undelay with the idea of establishing world-class research institutes to provide quality education and research, attract leadership and talent, and promote international cooperation. PAU uses a network of such existing structures of five flagship institutes in critical academic areas addressing Africa's cross-cutting developmental issues, challenges and opportunities, mainly in Governance, regional integration water energy, science and technology, health, agriculture, etc.

PAU Structure Governance

PAU operates under the direction of the AUC Department of Human Re-sources, Science and Technology, as one managed by a singular Rectorate, with a Senate supervised by a council. The University focuses on five thematic areas, namely: Basic Sciences, Technology and innovation; Life and Earth Sciences (including Health and Agriculture), Governance, Humanities and Social Sciences; Energy and Water Sciences (including Climate Change); and Space Sciences. The thematic areas are assigned to institute hosted by existing Universities of excellence across Africa's five geographic regions as follows:

1. The Institute for Basic Sciences, Technology and Innovation (PAUSTI), hosted by the Jomo Kenyatta University of Agriculture and technology in Kenya (Eastern Africa)
2. The Institute for Life and Earth Sciences (including Health and Agriculture (PAULESI), hosted by the University of Ibadan in Nigeria (Western Africa)
3. The Institute for Governance, Humanities and Social Science (PAUGHSS), hosted by the University of Yaounde II in Cameroon (Central Africa)
4. The Institute for Water and Energy Sciences (including Climate Change (PAUWES) hosted by the University of Tiemcen in Algeria (Northern Africa)
5. The Institute for Space Sciences (PAUSS) to be hosted by a University in the republic of South Africa (Southern Africa)

Each PAU institute is headed by a Director, Staff of PAU Institutes include academic and administrative staff, who work within Departments and other units related to teaching, research extension activities and administration. Each of the related Institute has a Board which is responsible for the supervision of the academic, administrative, and financial management of the institute.

Administration requirements to Masters of Science programs
An applicant should satisfy any of the following requirements:

- i. Hold a minimum of Upper Second Class Honours of a Bachelors degree in the relevant field from a recognized University.
- ii. Any other qualification considered to be equivalent to (i) by the PAU Institute.

Duration

For regular students, the Master of Science course shall extend over a period of twenty-four (24) months. The Doctor of Philosophy course shall extend over a period of thirty-six (36) months.

Structure

- i. The Master of Science shall be done by course work, examination and dissertation.
- ii. A candidate shall take mandatory core course units and elective course units, as well as participate in seminars and internships if required in the curriculum
- iii. Except for the science courses, the second year of study shall be devoted to carrying out research, participating in seminars, and presentation of thesis.

General Regulation and Policies

Rules and regulation which apply to all PAU students include student discipline, examination regulations, extenuating circumstances, academic appeals and health and safety policy. Queries relating to the general regulations and procedures affecting students should be directed to the Academic Support Office. Students are expected to display courteous behaviours and discipline at all times.

Matriculation and Orientation

All new students will be required to officially register at specific PAU Institute as part of a mandatory orientation program. A schedule of matriculation and orientation, outlining various activities, will be issued to each student at the time of registration.

Students admitted to various programs at PAU will also be register in each academic year of study at the beginning of the semester. Any Student who fails to register will be considered to have withdrawn. Such a student will lose all privileges including the scholarship. It is the responsibility of the student to confirm the exact dates for registration during each year.

Director's Speech

This yearbook comprises of photo album of top management, sponsors and the graduands of the fifth set of PhD students and sixth set of MSc. students at the Pan African University Institute for Life and Earth Sciences (including Health and Agriculture). A total of four PhD students and fifty master's students graduated on 16th and 17th November 2021.

The fifty-four students graduated from the ten programmes offered at PAULESI. Of the fifty master's students, there are six from Environmental Management, four each from Mineral Exploration Geoscience and Reproductive Biology, five each from Petroleum Geoscience, Plant Breeding, Reproductive Health, Vaccine Production and Quality Control, Sport Management and Policy Development and Medicinal Plant Research and Drug Development, and six from Avian Medicine. Of the four Doctor of Philosophy candidates, one student each from Petroleum Geoscience, Mineral Exploration, Plant Breeding and Reproductive Health.

A total of fourteen students hail from the host country, Nigeria, six from Kenya, four from Cameroon, three each from Democratic Republic of Congo, Ethiopia, Somalia, Rwanda and Zimbabwe, two each from Malawi, Ghana, Liberia and Guinea, one each from Swaziland, Burundi, Eritrea, Uganda, South Sudan, Sudan and Benin.

Across the fifty-four graduating students, there are twenty-nine females and twenty-five males. There is one female PhD graduand and twenty-eight female MSc. graduands. There are three male PhD graduands and twenty-two male MSc. graduands.

These graduating students have worked tirelessly to excel and achieve this feat in their career and we are so delighted with their

achievements. They have also been found worthy in character and learning and PAULESI is so proud of them. For some of these graduands, it was the first time they were stepping out of the borders of their home countries while for some, it was the first time experience of being out of the reach of parental guidance and families. Bearing in mind the diverse culture and traditions across the continent, we believe that the period they have spent in Nigeria studying was worth the while as they have also seized the opportunity to enhance integration and networking with one another making them a well-rounded person. We believe that all their fond memories will continue even after departure to their various countries and globally. We also believe that they will continue to relate with their colleagues via the PAU Alumni association and continue to practice Ubuntu.

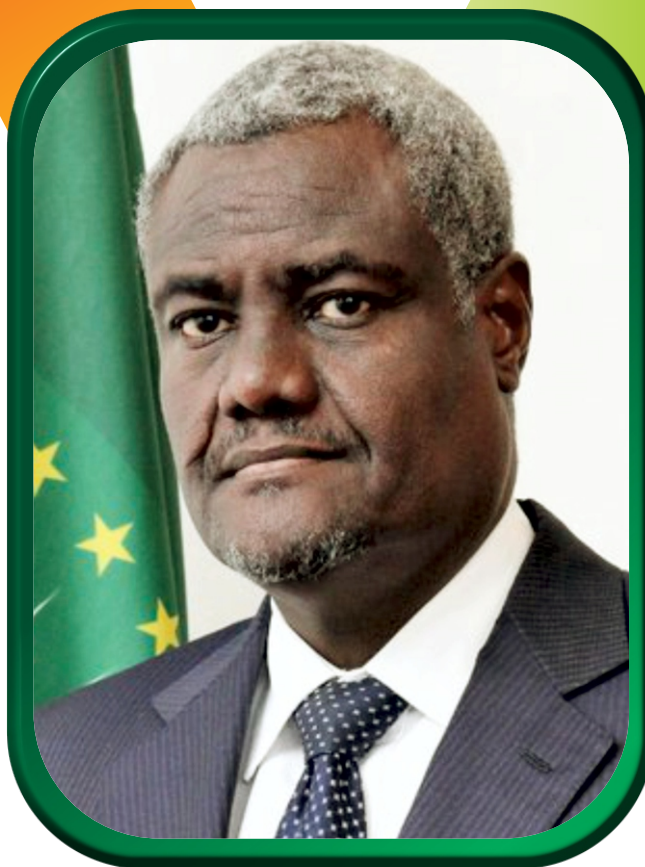

The opportunity to study through the PAU has been made possible from the culmination of the decision of the Assembly of Heads of State and Governments of the African Union to create the Pan African University (EX.CL/579(XVII)), having an Institute located in each of the five regions of Africa, with each having a specific thematic mandate. It is hoped that the vision will continue to be supported by the African Union Commission, the host countries and partners so that skilled human capacity in technical and scientific know how will continued to be achieved and to contribute to Africa's capacity building in human resources towards the fulfilment of the AU agenda 2063 – The Africa We Want.

We share in the joy of the graduates and wish everyone of you greater heights and more accomplishments in your career. It is our prayers that God will continue to shower His blessings on you. Remember to continue to nurture quality and exemplify excellence wherever you are.

We celebrate you!

THE GRADUANDS

Graduation Message to the Graduating Students of the Environmental Management Programme

On behalf of the entire faculty of the Environmental Programme of the Pan African University, Life and Earth Sciences Institute (Including Health and Agriculture), I am so happy to share in your graduation excitement as I am so proud of your achievements.

You have worked hard to achieve your goals and now you are on your way to seek new vistas, therefore, embrace life with passion and keep reaching for the stars. I am confident that there is no limit to what you can do if you keep believing in yourselves.

I hope you feel great about what you have accomplished, and that you will continue to be people who show up day in and day out for those things that are

worthwhile and important in life. This graduation will only be the first of many proud and successful moments for you and I cannot wait to see you occupying top managerial environmental positions at national, regional and global arenas.

Congratulations and well done. However, remember that whatever you do, nev-er stop learning, exploring, growing and challenging yourself to be your best. You shall always walk the glory road.

Happy Graduation.

PROF. IBIDUN ADELEKAN
Programme Coordinator

The top section of the slide features a repeating pattern of the PAU logo on a light green background. The logo consists of a green circular emblem with a stylized plant and the text 'PAU' and 'The African University Unleashing Potential'.

MSc. ENVIRONMENTAL MANAGEMENT

The bottom section of the slide features a repeating pattern of the PAU logo on a yellow-to-orange gradient background. The logo is identical to the one in the top section.

Graduation Message to the Graduating Students of the Geosciences Programme

On behalf of the staff of the Geology Department hosting the PAULESI Geosciences Programme, we heartily congratulate all our Graduating M.Sc and Ph.D Petroleum Geoscience and Mineral Exploration students.

It has been years of hard work, diligence and painstaking study. No doubt you have availed yourself very well, both academically and morally. We are very proud of you and we wish you well as you prepare to impact the world in your various countries with the knowledge acquired.

Congratulations!

Professor Olugbenga OKUNLOLA

Geosciences Programme Coordinator

PERSONAL INFORMATION

Name: KIANGUEBENE – KOUSSINGOUNINA Chrisfanel Eurode
Date of birth: 11 June 1990
Place of birth: Brazzaville, Republic of Congo
Gender: Male
Marital status: Single with one daughter
Nationality: Congolese
Contact Department: Department of Geology, University of Ibadan

QUALIFICATIONS

B.Sc. in Petroleum Engineering, Ufa State Petroleum Technological University, Federation of Russia (2014)

ACADEMIC/WORK EXPERIENCE:

April 2021 – July 2021

Internship [GISKonsult]

Map digitization, ArcGIS extension, Remote sensing, Database management.

October 2017 – November 2019

Teacher in Mathematics and Geology [High Schools]

Achievements/ Tasks

Created course material. Responsible for observing and documenting student behaviors and actions. Designed effective lesson plans for beginner and advanced science students. Assessed students background information to determine learning deficiencies and strengths, developed lessons tailored to student needs. Discussed problems with students and made plans to assist students who needed extra help.

TITLE OF RESEARCH WORK: “ASSESSMENT OF RARE METAL MINERALISATION POTENTIALS IN RESIDUAL SOILS OF PARTS OF IBADAN SHEET 261, SOUTHWESTERN NIGERIA”

PUBLICATIONS: Baseline elemental distribution in residual soils of Awa – Ijebu, and Ita – Egba areas, southwestern Nigeria. (Under review)

OTHER SKILLS: Proficient in MS 2016 such as Word, Excel, and PowerPoint, Proficient skills in surfer, Proficient skills in ArcGIS, Proficient skills in QGIS, Proficient skills in SPSS.

LANGUAGE PROFICIENCY:

French – Native,
English – Fluent,
Russian - Fluent

- Home country: 07, Rue des Ecoles Mansimou (OMS)

PERSONAL INFORMATION

Name: **MAGUIDI Allakê Yasminan**
Date of birth: **04 January 1994**
Place of birth: **Ikpilè, BENIN REPUBLIC**
Gender: **Female**
Marital status: **Single**
Nationality: **Beninese**
Contact Department: **DEPARTMENT OF GEOLOGY, UNIVERSITY OF IBADAN**

QUALIFICATIONS:

Bsc. Geosciences and applications, University of Abomey calavi (2016).

ACADEMIC/WORK EXPERIENCE

(LIST ALL EMPLOYMENT DETAILS TILL DATE):

Teacher of Biology and Geology College d'Enseignement General of Bembereke September (2019-December 2019).

Trainee geologist, Service of Mines Atlantique/Littoral and Service of Mines Borgou/Alibori (May 2017- january 2019).

TITLE OF RESEARCH WORK:

Petrographic and geochemical studies of gold-bearing rocks around pessoulou area, northtérn benin republic.

PUBLICATIONS:

Petrochemical and petrogenetic characteristics of metamorphic and intrusive rocks in Pessoulou area, Northern Benin (Western Africa): implications for gold concentration (under review).

OTHER SKILLS:

computing skills, map producing using Arcgis/qgis.

LANGUAGE PROFICIENCY:

French Language-Fluent, English language- fluent

Graduation Message to the Graduating Students of the Medicinal Plant Research and Drug Development Programme

I heartily congratulate you for the well-deserved success in completing your MSc. programme in Medicinal Plant Research and Drug Development with honours. The department is very proud of your achievement. You have been well trained and equipped to bring positive changes to the African region in issues that relate to medicinal plants research and drug development. Please go ahead and be vanguards for PAULESI. Best wishes in your future adventure!

Professor Mubo A. SONIBARE

Programme Coordinator

MSc. MEDICINAL PLANT RESEARCH AND DRUG DEVELOPMENT

Graduation Message to the Graduating Students of the Plant Breeding Programme

Hearty congratulations to our PAU-Plant breeding programme Graduants. I am sure you had a very exciting time and experiences during the course of learning and rudiments of plant breeding as a special field of Agriculture. The skills the programme taught you is a foundation to grow and develop the future plant breeders in your Countries as well as Africa in general. We in the Department of Crop and Horticulture Sciences (Formerly Agronomy) and the Pan African University Life and Earth Science Institute (including Health and Agriculture) PAULESI would be proud to follow your progressive contributions to the future development of humanity. Once again, I say Congratulations.

Professor Julius Akinyemi FAGBAYIDE
Programme Coordinator

The top section of the slide features a repeating pattern of the PAU logo on a light green background. The logo consists of a green plant icon with a red circular arrow around it, and the text 'PAU' and 'The African University of Science and Technology' below it.

MSc. PLANT BREEDING

Nationality: **Ghanaian**
Contact Department: **DEPARTMENT OF CROPS AND HORTICULTURAL SCIENCES, UNIVERSITY OF IBADAN**);

QUALIFICATIONS: BSc. Agricultural Biotechnology, Kwame Nkrumah University of Science and Technology (2018). MSc. Plant Breeding, Pan African University of Life and Earth Science (including Health and Agriculture) (2021).

ACADEMIC/WORK EXPERIENCE:

Research Fellow: International Institute of Tropical Agriculture (IITA) (2019-2021)

Principal Responsibilities: Molecular and Laboratory Analysis, and Cassava breeding program. Establishment of Field evaluation trial for cassava. Genotyping of cassava using SNPs linked with total Carotene content, dry matter and hydrogen cyanide; laboratory analysis of hydrogen cyanide and carotenoid content. Hand pollination in maize and cassava.

West African Center for Crop Improvement (WACCI), University of Ghana (2019)

Principal Responsibilities: Virus identification, Isolation and Viral DNA purification. Identification of different strains of bacteria and viruses using electronic microscope; Artificial inoculation of viral particles in plant for disease examination. Mutation breeding in maize for fall armyworm resistance.

Teaching and Research Assistant, Insectary@ Entomology and plant pathology section, Crop and Soil Sciences Department- KNUST (2018).

Principal Responsibilities: Assistant to research of Undergraduates and postgraduate studies. Organizing Tutorials for undergraduate students. Input and analyses of field and laboratory Data using statistical software such as, GenStat, Excel, SPSS, etc.

Molecular and Tissue Culture laboratory, Crop and Soil Science Department, KNUST, Kumasi - Ghana (2016-2018).

Principal responsibilities: *In vitro* conservation of taro using half and full-strength MS media with different levels of sucrose; DNA extraction, PCR and Electrophoresis of leaf samples of crops such as cocoyam and taro; Characterization of maize varieties and Genotyping of Rambutant/nutmeg using SSR makers.

Department of Horticulture, Faculty of Agriculture, KNUST-Kumasi (Field work/Greenhouse-internship) (2016-2017)

Principal responsibilities: Grafting, layering and budding of horticultural flowers. Growth of carrot, spring onion and other horticultural crops under intensive management.

Microbiology Laboratory Department of Biological Science, KNUST (2015-2016)

Principal Responsibilities: Identification and testing of different microbial population in a given sample. Culturing of different strains of bacteria and fungi on various growth media.

TITLE OF RESEARCH WORK: GENETIC DIVERSITY FOR HYDROGEN CYANIDE POTENTIAL, CAROTENOIDS AND DRY MATTER CONTENT AND VALIDATION OF SINGLE NUCLEOTIDE POLYMORPHISM MARKERS ASSOCIATED WITH THE TRAITS IN CASSAVA (*Manihot esculenta* Crantz).

PUBLICATIONS: Elimination of cassava mosaic Virus from diseased mother plant via meristem tip isolation culture.

OTHER SKILLS

Data analysis using R statistical package, SAS, Excel and GenStat.

Basis Bioinformatics

Data Management

Laboratory DNA analysis such as PCR, Gel Electrophoresis, DNA Extraction

Graduation Message to the Graduating Students of the Reproductive Health Sciences Programme

On behalf of the staff of the Geology Department hosting the PAULESI Geosciences Programme, we heartily congratulate all our Graduating M.Sc and Ph.D Petroleum Geo-science and Mineral Exploration students.

It has been years of hard work, diligence and painstaking study. No doubt you have availed yourself very well, both academically and morally. We are very proud of you and we wish you well as you prepare to impact the world in your various countries with the knowledge acquired.

Congratulations!

Professor M. A. OKUNLOLA

Geosciences Programme Coordinator

Graduation Message to the Graduating Students of the Sport Management and Policy Development Programme

We at the Sport Management and Policy Development programme of Paulesi sin-cerely congratulate all our students and students from other programmes on this oc-casion. This hard earned success has come with a well-deserved prize. We trust that you are very proud of yourselves and confident in your ability to rise to your next challenge. We celebrate the dedication shown on the way to this achievement. I am very proud of you and congratulations once again.

Professor O. A. ADEGBESAN
